Subject: Rep Assistance with Yaskawa A1000 VFD

David,

Many thanks for your precise and consistent support for the installation of the new Yaskawa A1000 VFD here at the Idaho National Engineering Laboratory (INL) MFC site.

Thanks to your persistent, accurate and professional guidance, the new Yaskawa A1000 VFD is working perfectly with our PLCs. Without your assistance life would have been much more difficult. Our plans are to continue to replace aging systems with the Yaskawa A1000.

Thanks again for your professional and accurate assistance.
